

Training Requirements

This information covers the training requirements necessary for being a Tesla Approved Body Shop.

Training Requirements

Overview

All participants of the Tesla Body Repair program must obtain valid certifications and complete all required trainings.

What certifications do I need to join the program?

Participants must complete I-CAR Aluminum & Steel Welding Training and obtain WCA03 and WCS03 certification to qualify.

What if I already have my I-CAR WCA03 and WCS03 certification?

Tesla recognizes WCA03 and WCS03 certification up to three years from date of issue.

What online training am I required to take?

Online Training requirements differ based on job role. To learn more about training requirements, please review the Online Training Requirements spreadsheet on page 3.
